ATTENTION

THIS CHART CONTAINS OFF ROUTE OBSTRUCTION CLEARANCE ALTITUDES (ORCA).
The off route obstruction clearance altitudes shown in quadrangles bounded by solid lines of latitude
and longitude are represented in THOUSANDS and HUNDREDS of feet above mean sea level. The ORCA
is based on information available concerning the highest known features in each quadrangle, including
terrain and obstructions. ORCA provides obstruction clearance with a 1000 foot buffer in designated
non-mountainous areas and a 2000 foot buffer in designated mountainous areas within the United States.
For areas in Mexico and the Caribbean which are located outside of the U.S. AER, ORCA provides
obstruction clearance with a 2000 foot buffer. This altitude is provided for obstruction clearance only.
It does not provide for NAVDAD signal coverage or communication coverage, and would not be consistent
with altitudes assigned by the Traffic Control.
